Changing Bucket, lid + handle, white polypropylene		1 gal.	PRCN0005	6 buckets + lids/case

Helpful Hint: The best way to clean a room or area is from the top downward and left to right. This helps ensure contamination isn't brought back into areas already cleaned.

LOW

Products designed to clean, help disinfect, and help reduce cross-contamination on low areas and surfaces such as floors, baseboards, mats, walkways, etc.

Polypropylene Sieve - Blue autoclavable		Not applicable	2738	1 sieve/case

Why Add Bacteria to Your Bucket?

One mop is as good as any other, right? Not exactly. The truth is that microfiber works best the first time it's used. After that, it's just a magnet for nasties. Why? Because microfiber, while great at grabbing up bioburden from floors or surfaces, is terrible at letting go—even when washed. So why take on that risk with tonight's facility cleaning?

Laundry-Free™ Premira® Microfiber Pads are revolutionary. You get brand new microfiber every time, because our products are laundry-free! You also get superior particulate removal and liquid absorption every time, because Laundry-Free™ Premira® Microfiber products are single use. And because Laundry-Free™ Premira® Microfiber Pads are white in color, you can actually see the dirt and debris you're moving, unlike those fuzzy, graying mops sitting in your laundry bins.

So simplify your cleaning life! Reduce logistical headaches, Purchasing Managers and get cleaner work environments, Facility Managers! The Laundry-Free™ Revolution is here!

When **Clean**
Counts
MOSTTM

Count On **Contec**[®] Professional

Our products are durable, maximize the efficacy of cleaning chemicals, and help eliminate cross-contamination. We help you ensure critical environments are truly clean.

Contec is proud to offer several products on the EPA's List N.*

*Sporidicin[®] is listed on the EPA's List N for use against SARS-CoV-2, the virus that causes COVID-19.
